

- Border notes**
- Actual project dimensions must be verified prior to production.
  - Notches are performed automatically unless otherwise agreed.
  - Loads:
    - Dead load roof: 650 N/m<sup>2</sup>
    - Dead load ceiling: 500 N/m<sup>2</sup>
    - Snow load: 1750 N/m<sup>2</sup>
    - Wind load, (velocity pressure): 767 N/m<sup>2</sup>
    - Live load attic: 500 N/m<sup>2</sup>
  - Total horizontal and vertical dimensions of building elements must not deviate from project specifications beyond the following tolerances:
    - Dimensions up to 10m (inclusive): ± 10mm
    - Dimensions over 10m: ± 1mm / m
  - This drawing and the attached calculations are the property of Tenter Latvija, SIA. Copying, distribution, or use of these drawings without the express permission of Tenter Latvija, SIA is prohibited.
  - Roof area: 121.0 m<sup>2</sup>
  - Wall height - 2500mm  
Building footprint - 80m<sup>2</sup>  
Living space - 76.3m<sup>2</sup>
  - Window and door openings:
    - 1 no. 2500x2100
    - 1 no. 1000x2100
    - 2 no. 800x2100
    - 2 no. 800x1400
